National Association of Commercial  
Finance Brokers

## Our Profile

Cashflow Acceleration Limited are a firm of independent commercial finance brokers who specialise in the factoring, invoice discounting trade finance and asset finance markets.

Between them, our consultant directors have over 35 years industry experience and we have access to all the major finance providers. We handle the whole of the UK.

---

## How The Quotation Search Service Works

We provide free, independent advice and a market wide quotation search facility to businesses that want factoring or invoice discounting facilities to release the cash that is tied up in their sales ledger.

Even if you already have a facility we are normally able to save you money by finding you improved quotations. We are known within the industry so we are able to negotiate favourable rates on your behalf and we are aware of the latest offers and discounts.

We can find providers that will solve service or funding problems that you may be having with your existing provider.

We can also help you find trade finance and asset finance facilities e.g. leasing & hire purchase.

We will provide you with ongoing support throughout the process to ensure that it is carried out as smoothly as possible. We know the pitfalls so we can help you avoid them.

Even if you have been declined by a provider or have credit issues such as County Court Judgements or creditor pressure we may still be able to help you.

All contact is treated in strict confidence and you will have no obligation to go any further.

---

## No Charges

Our search service and all consultations are completely free of charge for you to use. We receive a commission from the finance provider

if we successfully find you a facility. It is highly likely that we will be able to improve on any existing facility or quotations that you have.

---

## Products & Services We Can Find For You

These are some of the facilities that we can find for you:

- Factoring
- Bad debt protection (non recourse or credit protection)
